

Order Form — SAFER-HOME v. 3

The Safety Assessment of Function and the Environment for Rehabilitation - Health Outcome Measurement and Evaluation (SAFER-HOME) v. 3 is an occupational therapy assessment developed for use with the elderly and adults with disabilities living in the community. A group of experienced occupational therapists and researchers have developed the SAFER HOME v. 3 tool and manual after years of clinical uses and research studies in Toronto, Ontario, Canada.

SAFER HOME v. 3 consists of an easy-to-use checklist of 74 items grouped into 12 areas of concern: living situation; mobility; environmental hazards; kitchen; household; eating; bathroom and toilet; medication, addiction and abuse; leisure; communication and scheduling; personal care and wandering.

The 100-page manual provides administrative instructions, detailed guidelines and seven case studies. It provides all the information needed to understand how the tool was developed and tested, whom it is designed for and how to use it. The guidelines and recommendations section provides extensive listings of questions and recommendations for therapists to conduct a comprehensive assessment and to make a wide range of suggestions on how to resolve the concerns identified. The case studies walk the therapists through the process of doing an assessment and making appropriate recommendations.

INSTRUCTIONS:

To place your order, please use one of the following methods:

- Print form, complete it and mail to VHA Rehab Solutions 477 Mount Pleasant Rd. Suite 500, Toronto, Ontario, Canada M4S 2L9.
- OR
- Print form, complete it and fax to 416-489-7533 or email to info@vha.ca
